Analysis of the phenomenon of bullying in one of its classic manifestations, the scholastic one. History of two groups of boys, one without social and aggressive references up to violence and the other who, although subjected to a series of harassment, tries to react civilly, hoping for a limited duration of that behavior.

Stefano tries to fit into an environment that he does not yet know well, apart from the already existing friendship of Silvana, one of his age for whom the boy has a crush. The life of Stefano and his new friends is made difficult by a group of bullies that torment the most fragile of the school, starting with Dino, a gay boy very friendly to Silvana. The group of friends understands that only the union can be strength, but this does not prevent to bring the story into the tragedy...
